DETAILED ACTION

Response to Amendment

- The amendment of claims 6-13 and 18-21 has been found supported by the original claims.
- The previous 102 rejections of claims 1-20 over Kasai et al. have been overcome by argument.
- The previous 103 rejections of claims 1-29 over Nagasaki et al. in view of Kasai et al. have been overcome by argument.
- The previous provisional ODP rejections of claims 1 and 15-17 over 10/585757 have been **maintained**.

Claim Rejections - Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Art Unit: 1796

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1 and 15-17 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 21-24 of copending Application No. 10/585757. This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Disclosure of 10/585757 is adequately set forth in ¶2 and is incorporated herein by reference.

Allowable Subject Matter

1. Claims 1-29 are allowable over the closest prior art: Nagasaki et al. (US 20030215701) listed on IDS.

. Nagasaki et al. discloses a polymer for making electrodes having the following structure:

, wherein R⁵ can be hydrogen, etc.

However, the above structure is different from claimed structure of claim 1:

, wherein $X^1 = -NH-R^5-NH-$ or $-NH-R^6-$ wherein R^5

and R^6 can't be hydrogen.

Therefore, claim 1 is allowable together with its dependent claims 2-29.

Response to Arguments

The applicant's argument has been fully considered and partially persuasive. The examiner agrees Kasai et al. is disqualified as 102 e reference, because it has been published in Japanese (Pg. 3). Consequently, all previous rejections of claims 1-29 over prior arts have been withdrawn.

However, the examiner disagrees the argument traversing the previous provisional ODP rejections (Pg. 2). Although 10/585757 fails to disclose electrode in claims, the copending application is substantively the same as present invention, because its specification ([0050]) discloses those polyaminoquinoxaline are used to make electrodes. Case law holds that those portions of the specification which provide support for the patent claims may also be examined and considered when addressing the issue of whether a claim in an application defines an obvious variation of an invention claimed in the patent. **In re Vogel**, 422 F.2d 438, 164 USPQ 619,622 (CCPA

Art Unit: 1796

1970). Therefore, it would have been obvious to one of ordinary skill in the art to develop the electrode like presently claimed in claims 1 and 15-17 as claimed by 757'.

Accordingly, **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
